NOTES (*):

PDC mode (PDC direct*) - directly connection output MP2S-CAN to car PDC unit according to dedicated manual

PDC mode (automatically by car*) - rear PDC sensors are automatically deactivated by computer of car

PDC mode (use output from module*) - output signal from MP2S-CAN ("ground disconnected") for use by installer

FOG light mode (off by car*) - lighting of car FOG lights is blocked by computer of car

STOP - if STOP lamp on trailer isn't controlled from CAN-Bus, then RED input wire should be connected to the signal of car STOP lamp

FIS - only car with Driver Information System (DIS = Fahrerinformationssystem FIS)
